speed_penguin6101

1. Clicks create course and not quiz.
2. Creates a quiz in the course.
3. Very fast with the insertion of questions and answers.
4. Finds the time limit very fast.
5. Hasnt added right answers yet but the safety net will surely catch thath.
6. Remembers to add right answers, no need for safety net.
7. Goes through every question to make sure they are right.
8. Finished

Subjects thoughts:
First site was confusing. Didn't see button. The zoom thing was covering it.
Speedran it and might have missed some things but felt like it was easy anyways.
Felt like some buttons weren't obvious to what they would do.
Feels like the create a kahoot button can be confusing if you don't know what a kahoot is. Also the creation of the kahoot.

Previous experience:
Has made quizzes before and had been attending quizzes too.

Kungen6801
Encountered difficulty with zoom. Not very user friendy according to Don Norman hahahaha.

1. Create new very fast
2. some difficulty with creating a new question
3. "Quiz" and not "Question" seems to be somewhat confusing.
4. Tries to save the kahoot after the first question is created. Safety net prompt.
5. Has not put the timer correctly, fault might be on my part for not explainnig properly.
6. Remembers to put in the answers.
7. Uses copy-paste to insert questions and alternatives.
8. No sign of any frustration of irritation. Some confusion.
9. Overall very effective.

Subjects thoughts:
Simple
You learn as you go and then you remember
Didnt understand at first, specifically the way the questions are structured to the left.

Subject has previous experience but doesn't remember anything and says it felt like it was the first time.

Thehomie1337
The GUI changes when you resize the window making it a little bit harder to create a quiz:
Some buttons change like the "create" button, it becomes a plus.
The circle for marking the right answer become smaller and sometimes when clicked something else pops up blocking the request to mark the right answer, frustrating.

Otherwise the creation of the quiz went smoothly.

The subject has previous kahoot experience.

What We Will Do:
You will use a digital system (kahoot), and I'll watch how you do it.
It's not about you personally; it's about how the system works.
I won't share what we learn with lots of people.

No personal information:
No personal information will be recorded or kept.

No Photos or Videos:
I won't take any photos, record sound, or make videos of you.
That way, your personal information is safe.
I'll just take notes.
